

Bringing Balance to the Heart with Lawful Thinking

RECENT WORKS BY FRANK CHESTER

What might the living forms inside us have to do with those forms surrounding us and the thinking by which we are able to unite the two? Join Frank Chester in an exploration of how we balance the heart through lawful thinking. He will also present his most recent work, including a new architectural model created in honor of the 100th anniversary of the conception of the first Goetheanum.

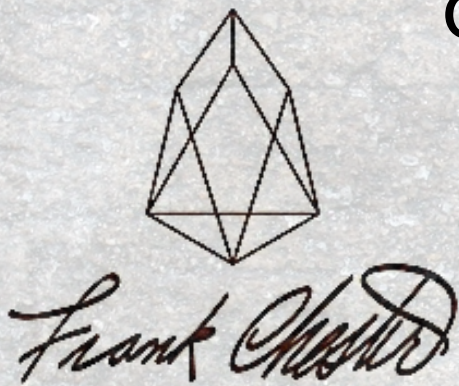

Frank will be exhibiting his work and discoveries at the Goetheanum in Dornach, Switzerland December 10th - 18th, 2011. More information about this exhibition www.einszueins.goetheanum.org

JANUARY 13TH 7PM \$12

FOLLOWING "BALANCING THE HUMAN HEART
WITH LAWFUL THINKING" BY FRANK CHESTER
ON FRIDAY, JANUARY 13TH, 2012 AT 7PM

Making a Chestahedron Geometry of the Human Heart

Geometry with Matt Taylor &
Eurythmy with Dean Pollard

The discovery of the seven
sided Chestahedron has led to
breakthrough findings of the
true nature of the human heart.

In this half day workshop, participants will move forms in
Eurythmy and make their own model of a Chestahedron to
bring home.

Price: \$20 for Saturday Workshop
\$30 for both workshop and Friday evening lecture
Contact Daniel Bittleston for more information (831) 212-1947

9:30AM - 12:30PM
